Everything, in its place

LONGSPAN SHELVING

Longspan shelving is designed to be a cost effective, mid-range storage solution. It is easily assembled and light weight but can hold up to 800kg per shelf.

Flexible system

Longspan works in both industrial and commercial applications to fit into tight spots. Our flexible system allows you to grow as your business grows by simply adding to your existing frames and shelves.

Storage made easy

PRS makes it even easier as the frames are delivered assembled so you simply need to slot the shelves into your chosen heights, no tools required! Or if you prefer we can also install your Longspan shelving for you, just tell us where and when. We supply plastic caps to fit the top of the posts for a professional finish.

Specifications

Frame Heights (mm)	900	1800	2100	2400	3000
Beam Lengths (mm) Beam level increments are 25mm. The beam is a strong 4 pin connection to the frame	900	1200	1500	1800	2400
Shelf Depths (mm) Choose from MDF, Steel or Wire Mesh	450	600	900		

Shelf options

- **Steel** – hygienic option, perfect for food and chiller storage
- **MDF** – doesn't allow small items to fall through and is ideal for office files and fabric storage
- **Wire mesh** – improves light, airflow and sprinkler access while reducing dust build up
